BRINGING NEWS OF SAFETY, QUALITY , & PRODUCTIVITY

VOLUME 1, ISSUE 2 NEWSLETTER DATE: JULY 1ST, 2006

SAFETY SOLUTIONS

The Cat Spec “STOP” program is an employee hazard awareness and hazard recognition process which focuses on the behavior of employees through better communications by physically assessing the task at hand prior to task start up, recognizing hazards seen and unseen, and then protecting against or mitigating the hazards. It provides an employee empowerment mechanism to identify and correct unsafe acts and conditions found in the workplace and gives them the right

to STOP a job if it is deemed unsafe. The STOP program fosters the concept of employees talking to employees, using effective communication skills to raise the level of awareness of safety consciousness. STOP cards will be the basis of performing this program. STOP is also the basis for Cat Spec’s Stop Work Policy. All employees have the right and the responsibility to stop work that exposes any employee to imminent danger and/or injury.

“We strive to be the leader in the catalyst service industry, by providing all clients with the best personnel and equipment on every related project. We are committed to the highest levels of SAFETY and QUALITY to ensure complete customer satisfaction.”

OPERATIONS - COMPLETED MAJOR PROJECTS

Sterling Chemical - Texas City Styrene Turnaround:

I would like to thank the entire Cat-Spec Team for the outstanding job everyone did during our recent Styrene Turnaround. Cat-Spec responded quickly and accommodated our changing schedules for

catalyst removal from both reactors and completed both jobs within the scheduled time frame. The mechanical division did a fantastic job of completing internal repairs, again, within the schedule. I was very pleased to see the way repairs, modifications, and communications were handled between your team and ours. Most importantly, I want to commend

Cat-Spec for the outstanding safety performance (zero injuries and incidents) demonstrated by everyone during the turnaround. We greatly appreciate it!

Carlos A. Mata
Maint. Mgr./Sterling Chemical-Texas City
